SOLID WASTE
MANAGEMENT PROGRAM

Burt:

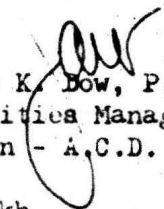

The readings of Trichlorethylene taken October 30, 1981 are as follows:

Clarifier	120 PPB
Sanitary Lagoon	16 PPB
East Well	11 PPB
West Well	66 PPB

Notice the clarifier level has dropped significantly since the last reading. Although I would have expected it to be closer to zero at this point, it is going in the right direction.

If you have any questions, please do not hesitate to contact me.

Very truly yours,

James K. Dow, P.E.
Facilities Manager
